### Abstract

**Objectives:** MicroRNAs have been shown to be related to specific types of malignant cell growth. In case of urothelial bladder cancer (BCa), novel noninvasive diagnosis is particularly required and it is attractive to consider, as urine is an easily available source for molecular markers including RNA. In this context, we aimed to develop a clinically applicable and sensitive protocol for the preparation and molecular analysis of low molecular weight RNA from urine samples obtained from bladder cancer patients or healthy volunteers.

# Електронске књиге

- Електронске књиге су дигитализоване, виртуелизоване верзије књига које се могу читати преко рачунара или посебних уређаја – читача електронских књига.
- Многи програми и уређаји који се користе за приказивање садржаја електронских књига омогућавају читаоцу функционалност на коју је он навикао приликом читања књига штампаних на папиру: обележавање текста подвлачењем, дописивање коментара и обележавање страница.

# Електронске књиге

- Електронске књиге се најчешће презентују у PDF формату и могуће их је на рачунару читати помоћу апликације Acrobat Reader, а овај формат препознаје и већина читача електронских књига
- Данас у свету постоје многобројни модели ових уређаја од којих се тренутно два издвајају својим квалитетом и распрострањеношћу: Sony eBook Reader и Amazon Kindle.

# Електронске књиге

Електронске књиге могуће је читати и на таблет рачунарима и мобилним телефонима. Физичке димензије ових уређаја отварају нове просторе и нове временске периоде за читање.

# Електронске књиге

Да би читање било ефикасно и продуктивно потребно је користити уређаје примерене датим околностима и окружењу. Читачи електронских књига са екранима на бази технологије електронског мастила (Amazon Kindle) погодни су за “дуго читање”, док су таблет рачунари предвиђени за “кратко читање”.

### O servisu

Servis obuhvata preko 30.000 naslova knjiga iz svih oblasti nauke. Klikom na naslov knjige otvara se njen sadržaj u Quick view pogledu. Za punu funkcionalnost korišćenja teksta (kopiranje, štampanje, naglašavanje- highlight, dodavanje beleški ) potrebno je instalirati ebrary Reader (jednostavnim klikom na dugmence Install u instalacionom prozoru). Servis omogućava kopiranje teksta u druge aplikacije uz automatsko citiranje i izbor stila citiranja (MLA, APA i dr.). Preporučuje se otvaranje ličnog naloga na ovom servisu (Create Your User Account) koji pruža niz pogodnosti: pravljenje sopstvene police knjiga, pamćenje obeleženog teksta i unetih komentara. Prilikom otvaranja naloga mora se prijaviti e-mail adresa otvorena na nekom od pretraživača (gmail.com, yahoo.com, hotmail.com). Takođe, otvaranje ličnog naloga i kompletna funkcionalnost omogućeni su isključivo preko Akademske računarske mreže. Za sada, ove opcije nije moguće koristiti preko "Udaljenog pristupa".

Nije dozvoljeno štampanje i kopiranje teksta cele knjiga, a broj stranica koje je moguće štampati i/ili kopirati u druge aplikacije je ograničen.
